Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Longmans, Green, & Co.'s New Books

PETTIGREW.—Design in Nature.
Illustrated by Spiral and other arrangements in the Inorganic and Organic Kingdoms as exemplified in Matter, Force, Life, Growth, Rhythms, &c., especially in Crystals, Plants, and Animals. With Examples selected from the Reproductive, Alimentary, Respiratory, Circulatory, Nervous, Muscular, Osseous, Locomotory, and other Systems of Animals.
By J. BELL PETTIGREW, M.D., LL.D., F.R.S., F.R.C.P.; Laureate of the Institute of France; Chandos Professor of Anatomy and Medicine in the University, St. Andrews; Fellow of The Royal Botanical, Medico-Chirurgical, Royal Medical, Literary and Philosophical, Harveian, and other Societies; formerly Dean of the Medical Faculty, University, St. Andrews; President of the Royal Medical and Harveian Societies; Member of the General Council of Medical Education and Registration of the United Kingdom; Examiner in Anatomy at the University, Glasgow, and in Physiology at the Royal Colleges of Physicians and Surgeons, Edinburgh, &c. Illustrated by nearly 2,000 Figures, largely original and from nature. In 3 vols., medium 4to. $16.00 net.

GASKELL.—The Origin of Vertebrates.
By WALTER H. GASKELL, M.A., M.D. (Camb.), LL.D. (Edinburgh, and McGill University, Montreal), etc. With 160 Illustrations, some of which are colored. 8vo. Pp. x-537. $6.00, net.
This book is the outcome of twenty years' work. In it is put forth a theory of the Origin of Vertebrates, which is based upon two fundamental propositions: (1) That the essential factor for the upward evolution of all animals is growth of brain power. (2) That each higher group of animals has arisen from some member of the highest group evolved up to that time, and not from a lower group.
All the evidence, whether anatomical, physiological, or palæontological, points to the conclusion that the vertebrates arose from the highest invertebrate group—the arthropods—which were the dominant race at the time when vertebrates first appeared.

HOPF.—The Human Species: Its Specific Characteristics considered from the Standpoints of Comparative Anatomy, Physiology, Pathology and Bacteriology.
By Dr. LUDWIG HOPF, of Stuttgart. Authorized English edition. With 7 Plates and 217 Illustrations in the Text. 8vo. $3.00 net.

PRINCE.—The Dissociation of a Personality. A Biographical Study in Abnormal Psychology.
By MORTON PRINCE, M.D., Professor of Diseases of the Nervous System, Tufts College Medical School; Physician for Diseases of the Nervous System, Boston City Hospital. *Second Edition.* 8vo. Pp. xii-575. $2.80 *net.* By mail, $3.00.

MORAL INSTRUCTION AND TRAINING IN SCHOOLS. Report of an International Inquiry.
In Two Volumes, Sold Separately.
Edited, on behalf of the Committee, by M. E. SADLER, Professor of the History and Administration of Education in the University of Manchester.
Vol. I: The United Kingdom. Crown 8vo. Pp. lviii-538. $1.50, net.
Vol. II: Foreign and Colonial. Crown 8vo. Pp. xxviii-378. $1.50, net.

HOLMAN.—Pestalozzi: An Account of His Life and Work.
By H. HOLMAN, M.A. (Cantab), Formerly Professor of Education in the University College of Wales. With 4 Illustrations and Diagrams in the Text. Crown 8vo. Pp. viii-322. $1.10 *net.*

TOYNBEE.—Lectures on the Industrial Revolution of the 18th Century in England. Popular Addresses, Notes and other Fragments.
By ARNOLD TOYNBEE. Together with a Reminiscence of the author by LORD MILNER. *New and Cheaper Edition.* Crown 8vo., pp. xxxvi-282. $1.00.

MILL.—Autobiography.
By JOHN STUART MILL. *New Edition.* Crown 8vo. Pp. viii-191. $0.50.

LONGMANS, GREEN, & CO.'S NEW BOOKS

A PLURALISTIC UNIVERSE

Lectures on the Hibbert Foundation delivered at Oxford, 1908.

By WILLIAM JAMES. 8vo. $1.50, net. By mail, $1.64.

* * * The lectures in this volume were delivered under the title of "The Present Situation in Philosophy." In them the author vigorously criticises the school of transcendental idealism, which began at Oxford under the influence of T. H. Green, forty years ago, and continues his well-known attempt to save empiricism and pluralism from the reproach under which, according to him, they unjustly lie, of philosophies of irreligion and disintegration. The book, in spite of polemic passages, is intended to be conciliatory in its tendency, and to furnish a platform on which empiricism and rationalism may join hands in a concrete view of life.

A TEXT-BOOK OF EXPERIMENTAL PSYCHOLOGY

By CHARLES S. MYERS, M.A., M.D. (Cantab), etc., Lecturer in Experimental Psychology in the University of Cambridge, Eng., Professor of Psychology in Kings College, University of London.

Crown 8vo. pp. xvi-428, with 66 Diagrams. $2.40.

CONTENTS—I. The Standpoint of Experimental Psychology.—II. Cutaneous and Visceral Sensations.—III, IV. Auditory Sensations.—V. Labyrinthine and Motor Sensations.—VI., VII. Visual Sensations.—VIII. Gustatory and Olfactory Sensations.—IX. The Specific Energy of Sensations.—X. Statistical Methods.—XI. Reaction Times.—XII., XIII. Memory.—XIV. Muscular and Mental Work.—XV. The Psycho-Physical Methods.—XVI. Weight.—XVII. Local Signature.—XVIII. Sensibility and Sensory Acuity.—XIX. Experiences of Identity and Difference.—XX.—Binocular Experience.—XXI. Binaural Experience.—XXII. The Visual Perception of Size and Direction.—XXIII. Time and Rhythm.—XXIV. Attention.—XXV. Feeling—Laboratory Exercises—Index.

ANALYSIS OF THE EVOLUTION OF MUSICAL FORM.

By MARGARET H. GLYN, Author of "The Rhythmic Conception of Music," etc.

8vo. pp. xxviii-331. $3.50 *net.*

* * * The general drift of this theory of music has already been indicated in "The Rhythmic Conception of Music." The object of the present volume may be briefly stated to be the application of the evolutionary principle to practical music, the essential motive power of which is to be found in rhythm. By this it is possible to produce an analysis which, as promised in a former volume "shall weld all the various parts of musical education into one consistent and logical whole."

THE BODY AT WORK.

A Treatise on the Principles of Physiology.

By ALEXANDER HILL, M.A., M.D., F.R.C.S., recently Master of Downing College, Cambridge. With 46 Illustrations.

8vo. pp. xii-448. $4.50 *net.*

*** This is a book for the non-professional reader, and does not assume any technical knowledge. Dr. Hill describes the phenomena of life, their interpendence and causes in language intelligible to people of general education.

RECENT ADVANCES IN ORGANIC CHEMISTRY

By A. W. STEWART, D.Sc., Lecturer on Stereo-chemistry in University College, London; Carnegie Research Fellow; formerly 1851 Exhibition Research Scholar and Mackay Smith Scholar in the University of Glasgow. With an Introduction by J. NORMAN COLLIE, Ph.D., LL.D., F.R.S., Professor of Organic Chemistry in University College, London.

8vo. pp. xvi-291. $2.50 *net.*
